Connection Methods

TensionLite structures use a number of different yet simple connection methods. Your kit will include one or more of the connection methods shown below. Steps within the Kit Assembly will reference a specific method for each connection point.

Connection Method 1: ES30 / ES50 / ES75

Compress the unlocked connector and slide one tube onto each end. Lock both screws carefully using your allen key tool. Be sure to lock securely, but do not overtighten.

Connection Method 2: Snap Buttons & Swage

Locate the snap button on the connector or swage tube. Locate the hole on the corresponding tube. Press the snap button with your thumb and slide the tube and connector together so that the snap button snaps fully into the lock hole. To disassemble, press the snap button and pull apart.

Connection Method 3: ES30-90B / ES30-I / ES30-C

Compress one unlocked end of the connector and slide it through one tube end. Compress the other end of the connector and slide the second tube on. Lock both screws carefully using your allen key tool. Be sure to lock securely, but do not overtighten.

Connection Method 4: Tube Clamps

Be sure to fully assemble all frames before using clamps. With the clamp unlocked, place one tube of the first frame into the mouth of the clamp. Place the second tube (if applicable) into the second mouth of the clamp. With both frame's tubes in the clamp, be sure to lock securely, but do not overtighten.

Design Assembly

Step by Step

Step 1.

Gather the components necessary for assembling the frame and lay them flat on the floor. Assemble in the order the Labeling Diagram instructs.

Please reference Connection Methods 1 for more details.

Step 2.

With the frame laying flat on the floor, locate your pillowcase B graphic. With the pillowcase unzipped, encase the frame by covering the frame from top to bottom.

Step 3.

Attach the leg by snapping it into the TC-30-C connectors located on the rear side of your frame.

Step 4.

Attach the Tube 11 assemblies to the left and right side of the frame.

Refer to Connection Method 4 for more details.

Design Assembly

Step by Step

Step 5.

Using Velcro, attach the sintra accent graphics to the flat faces of the arms.

VELCRO

Step 6.

Attach the lights using the provided clamps.
