

TensionLite DesignerLine Series 20 ft. size Display Design 4

TensionLite Design 4 has unique stylistic features and shapes, are portable and easy to assemble. The aluminum tube frame features snap-buttons and / or spigot connections and zipper pillowcase fabric graphics. All displays come in portable, wheeled transit cases. Simply pull the pillowcase fabric graphic(s) over the frame and zip.

We are continually improving and modifying our product range and reserve the right to vary the specifications without prior notice. All dimensions and weights quoted are approximate and we accept no responsibility for variance. E&OE. See Graphic Templates for graphic bleed specifications.

features and benefits:

- Premium aluminum tube frames with snap button assembly
- Easy to store and ship
- Quick to set up
- Weighted feet for added stability
- Three zipper pillowcase fabric graphics
- Lifetime limited hardware warranty against manufacturer defects

Connection Methods

TensionLite structures use a number of different yet simple connection methods. Your kit will include one or more of the connection methods shown below. Steps within the Kit Assembly will reference a specific method for each connection point.

Connection Method 1: ES30 / ES50 / ES75

Compress the unlocked connector and slide one tube onto each end. Lock both screws carefully using your allen key tool. Be sure to lock securely, but do not overtighten.

Connection Method 2: Snap Buttons & Swage

Locate the snap button on the connector or swage tube. Locate the hole on the corresponding tube. Press the snap button with your thumb and slide the tube and connector together so that the snap button snaps fully into the lock hole. To disassemble, press the snap button and pull apart.

Connection Method 3: ES30-90B / ES30-I / ES30-C

Compress one unlocked end of the connector and slide it through one tube end. Compress the other end of the connector and slide the second tube on. Lock both screws carefully using your allen key tool. Be sure to lock securely, but do not overtighten.

Connection Method 4: Tube Clamps

Be sure to fully assemble all frames before using clamps. With the clamp unlocked, place one tube of the first frame into the mouth of the clamp. Place the second tube (if applicable) into the second mouth of the clamp. With both frame's tubes in the clamp, be sure to lock securely, but do not overtighten.

Design Assembly

Step by Step:

Step 1.

Locate the components necessary for assembling Frame A. Assemble your frame in order according to the Labeling Diagram.

Please reference Connection Method 2 for more details.

Step 2.

Locate the components necessary for assembling Frame C. Assemble your frame in order according to the Labeling Diagram.

Please reference Connection Method 2 for more details.

Step 3.

Locate the components necessary for assembling Frame B. Assemble your frame in order according to the Labeling Diagram.

Please reference Connection Method 2 for more details.

Step 4.

Fit graphic A onto Frame A. For ease of installation, pull the fabric cover up from the bottom of frame while the frame rests flat on the floor. Zip to enclose.

Zipper Located on the Top of Graphic A.

Bottom of Frame

Design Assembly

Step by Step:

Step 5.

Fit graphic C onto Frame C. For ease of installation, pull the fabric cover up from the bottom of frame while the frame rests flat on the floor. Zip to enclose.

Zipper Located on the Top of Graphic C.

Step 6.

Fit graphic B onto Frame B. For ease of installation, pull the fabric cover over the top of the frame while the frame rests flat on the floor. Zip to enclose.

Zipper Located on the Bottom of Graphic C.

Step 7.

To attach Frame A and C to Frame B, gather two PLT-BP-LN114-S3, and two LN114 screws. Attach the foot to the left side of Frames A and B and the foot to the right sides of Frames B and C.

Step 8.

Locate your PLT-BP-LN114-S3-450, one LN114 screw. Attach the foot to the foot to the center of Frame B.

Design Assembly

Step by Step

Step 9.

Use your provided allen key tool to connect the frames together using the TCP-3030's.

Please reference Connection Method 4 for more details.

Setup Complete.
